

Victoria López Valencia

QA Automation Lead | SDET | QA Architect

Alicante, Spain

victoria.valencia.86@gmail.com

Portfolio | Itch.io

Professional Summary

Senior Quality Engineering professional with 10+ years of experience designing scalable automation architectures, leading QA initiatives, and modernizing testing processes in SaaS and enterprise environments.

Strong technical background in Playwright, TypeScript, CI/CD, API automation, and quality engineering strategy. Proven experience building maintainable automation frameworks, driving shift-left testing practices, and improving release confidence through scalable automation ecosystems.

Focused on evolving QA into a continuous engineering quality process from ideation to production.

Core Skills

Automation & Testing: Playwright, TypeScript, JavaScript, Selenium, TestCafe, Cypress, Rest Assured, JUnit, API Testing, E2E Testing, Regression Testing, Component Testing

Quality Engineering: Test Automation Architecture, Page Object Model (POM), Shift-Left Testing, CI/CD Testing, Parallel Execution, Release-on-Demand Strategy, Flaky Test Analysis

DevOps & Tooling: Docker, Bitbucket Pipelines, GitLab CI, Jenkins, SonarQube, ESLint, AWS QuickSight, Jira, Confluence, Postman

Leadership & Agile: QA Leadership, Technical Mentoring, Scrum, Agile Methodologies, Stakeholder Collaboration, Process Improvement

Professional Experience

IRIUSRISK — QA Manager

Dec 2025 – Present

Remote, Spain

- Lead and mentor a team of 7 QA Engineers across multiple product squads and platform initiatives.
- Define QA strategy aligned with Platform Engineering roadmap.
- Create and monitor QA KPIs related to automation coverage, flaky tests, failed executions, and release quality.
- Develop and analyze AWS QuickSight dashboards for quality visibility and reporting.
- Collaborate with engineering leadership to improve testing processes and quality standards.

IRIUSRISK — Senior QA Engineer

Apr 2022 – Nov 2025

Remote, Spain

- Architected and developed a scalable Playwright + TypeScript automation framework based on a robust Page Object Model (POM) architecture focused on maintainability, reusability, readability, and parallel execution.
- Led the migration from an obsolete TestCafe + JavaScript framework to a modern Playwright + TypeScript ecosystem.
- Built and maintained automated E2E, regression, sanity, and API testing suites.
- Established a shift-left quality engineering strategy by integrating QA activities from the earliest stages of product initiatives, including ideation, refinement, and development planning.
- Collaborated proactively with Product, Frontend, Backend, and Platform Engineering teams to integrate quality practices throughout the SDLC.
- Improved execution performance through parallel Playwright workers and optimized CI/CD execution strategies.
- Integrated automated testing pipelines into Bitbucket CI/CD workflows for feature, release, and main branches.
- Introduced SonarQube and ESLint quality gates into pull request workflows.
- Promoted quality ownership across squads with the long-term objective of enabling stable release-on-demand processes.
- Delivered internal technical training sessions focused on Playwright adoption and automation best practices.

DEVCENTER — QA Lead

Apr 2021 – Apr 2022

Alicante, Spain

- Managed a distributed QA team across multiple projects.
- Defined QA strategies and automation approaches tailored to project requirements.
- Integrated SonarQube quality analysis into CI pipelines.
- Created QA documentation and promoted software quality best practices.

DEVCENTER — QA Engineer & Scrum Master

Apr 2018 – Apr 2021

Alicante, Spain

- Designed and developed automation solutions using Selenium, GingerSpec, Java, Cucumber, and Gherkin.
- Built GitLab CI pipelines for automated test execution.
- Worked as Scrum Master for a cross-functional Agile team of 10 members.

SOPRA — QA Performance Test Engineer

Mar 2017 – Mar 2018

Alicante, Spain

- Designed and executed performance testing strategies using JMeter.
- Analyzed execution results and created performance testing reports.

EMBARCADERO — Quality Assurance Engineer
Alicante, Spain

Apr 2014 – Aug 2016

- Developed automated tests using C#, Visual Studio, and Microsoft Coded UI.
- Maintained Jenkins workflows and automated execution pipelines.
- Worked with Oracle, SQL Server, MongoDB, MySQL, DB2, and Jira.

Education

Master's Degree in Videogame Design & Programming
Universitat Oberta de Catalunya

2025 – Present

Technical Engineering in Computer Management
University of Alicante

2006 – 2013

Certifications

- ISTQB Certified Tester Advanced Level – Test Automation Engineering (CTAL-TAE)
- ISTQB Certified Tester Foundation Level (CTFL)
- Professional Scrum Master I (PSM I)
- SonarQube Fundamentals

Languages

Spanish: Native

English: B2 Professional Working Proficiency

Technical Portfolio

Personal Portfolio Website

<https://pikyvictoria.github.io/>

The portfolio showcases hands-on experimentation, automation architecture concepts, frontend development projects, and technical initiatives focused on modern Quality Engineering practices.

Highlighted Areas

- Playwright + TypeScript automation framework experimentation
- Scalable Page Object Model (POM) architecture approaches
- Frontend projects developed with modern web technologies
- Quality Engineering proof-of-concepts and tooling exploration
- CI/CD-oriented automation practices and execution strategies
- Personal Unity game development projects and technical experimentation
